

STCA154 Information Sheet

Proposal Summary

Shared Tower is proposing the construction of a 30-metre shrouded monopole telecommunication tower at 356 Cranston Road SE, Calgary, AB. This development aims to address poor cellular service and enhance connectivity in the Cranston area. The design supports future co-location services, reducing the need for additional tower structures nearby.

356 Cranston Rd SE, Calgary
(50.879684, -113.976830)

30m tall

Designed for optimal
co-location abilities

Safe and essential for
communities

Local Land Use Requirements

Radio-communication tower/antenna systems are exclusively regulated by Federal legislation under the Radio-communication Act and administered by ISED. Therefore, Provincial legislation such as the Planning Act, including zoning by-laws, do not apply to these facilities. It is important to understand that ISED mandates that proponents follow the radio-communication guidelines and will make a decision on the feasibility of the construction of a tower.

Public Consultation

The City of Calgary has an established process under which this proposed tower application will proceed. The City of Calgary's public consultation process was reviewed to ensure the requirements will be met by Shared Tower.

Engineering Practices

Shared Tower Inc. attests that the radio antenna system as proposed for this site will be constructed in compliance with the Canadian Standard Association and comply with good engineering practices, including structural adequacy.

Canadian Impact Assessment Act

Shared Tower attests that the proposed tower described in this Letter of Rationale is excluded from environmental assessment under the Impact Assessment Act (IAA, 2019), formerly known as the Canadian Environmental Assessment Act (CEAA 2012).

Public Disclosure of Comments

Submissions received shall form part of ISED's Public Consultation Process under the Spectrum Management and Radiocommunications Client Procedures Circular CPC-2-0-03, Issue 5, and may be made public as part of a report issued to interested parties, the Municipality and ISED.

Transport Canada's Aeronautical Obstruction Marking Requirements

Shared Tower Inc. Canada attests that the radio antenna system described in this notification package will comply with Transport Canada / NAV Canada aeronautical safety requirements. When Transport Canada / NAV Canada have determined if any aeronautical safety features are required for the installation, such information will be provided to the municipality.

Any person may provide a written submission to the individuals listed below by **October 15th, 2026** with respect to this matter. Please reference **STCA154** in your correspondence.
